DETERMINATION OF CUSTOMS VALUES OF LOAD CELL UNDER SECTION 25-A OF
THE CUSTOMS ACT, 1969

(VALUATION RULING No. 861/2016)

No. Misc/07/2013-IX/9340

Dated: 01-06-2016

In exercise of the powers conferred under Section 25-A of the Customs Act, 1969, Customs values of different types of Load Cells are determined as follows: -

2. Background of the valuation issue: A number of complaints have been received, recently, regarding under-invoicing in import of different types of Load cells. The Director, Directorate General of Intelligence & Investigation (Enforcement), Karachi also forwarded some evidences including catalogues of a few suppliers, requesting this Directorate to re-determine Customs values of load cells. Thus, an exercise to determine the Customs values of the subject goods afresh was initiated.

3. Stakeholders' participation in determination of Customs values: Meeting was held on 12-04-2016 with stakeholders including the representatives of importers for their input on the subject issue. All the participants were requested to submit the following documents so that correct customs values could be determined:-

- i) Invoices of imports during last three months showing factual value.
- ii) Websites, names and E-mail addresses of known foreign manufacturers of the item in question through which the actual current value can be ascertained.
- iii) Copies of Contracts made/LCs opened during the last three months showing the value of item in question.
- iv) Copies of Sales Tax Invoices issued during last four months showing the difference in price (excluding duty and taxes) to substantiate that the benefit of difference in price is passed on to the local buyers.

4. However the importers did not bring any substantial evidence. They were given opportunity to submit the requisite documents in next four to six weeks to substantiate their claims. Few of the importers submitted some documents including import invoices, but none submitted substantive evidences which could corroborate their claims. However, the Director Directorate General of Intelligence & Investigation (Enforcement), Karachi vide his letter dated 03-05-2016, provided his feedback/input along-with catalogues of different international companies.

5. Method adopted to determine Customs values: Valuation methods given in Section 25 of the Customs Act, 1969 were followed to arrive at fair value of Load Cells. Transaction value method provided in Section 25(1) was found inapplicable due declarations at substantially suppressed values. Identical / similar goods value methods provided in Section 25(5) & (6) were examined for applicability to the valuation issue in the instant case which provided some reference values of the subject goods but the same could not be exclusively relied on due to wide variation and suppressed in declarations regarding values. Thereafter, market enquiries as envisaged under Section 25(7) of the Customs Act, 1969, were conducted. As the stakeholders were not forthcoming with the values of the subject items as being traded in the international market, therefore different markets were surveyed repeatedly for this purpose. Online prices were also obtained to corroborate the findings of the market surveys. Computed Value Method as provided in Section 25(8) could not be applied for valuation of

the aforementioned goods as the cost of raw material and fabrication charges under clause (a) and amount of profit and general expenses under clause (b) of Section 25(8) of the Act, in the country of export, could not be ascertained. All the information so gathered was evaluated and analyzed for the purpose of determination of customs values. Consequently, the Customs values of different types of Load Cell have been determined under Section 25(9) of the Customs Act, 1969.

6. Customs values for Load Cell: Load Cell hereinafter specified shall be assessed to duty / taxes at the following Customs Values:-
